SUMMARY

Results-driven **Software Engineer** with hands-on experience in developing **enterprise-grade software, websites, and mobile applications**. Skilled at leveraging **AI tools and automation platforms** to independently build end-to-end projects. Strong background in **Artificial Intelligence, Data Science, and Full-Stack Development**, with a proven ability to deliver innovative solutions under tight deadlines.

EDUCATION

B.Tech in Artificial Intelligence, GH Rasoni College of Engineering and Management

8.23 CGPA, 2020 – 2024

Honors in Data Science, GH Rasoni College of Engineering and Management

2022 - 2024

SKILLS

- | | | | | |
|------------------------|---------------------|---------|---------------------|----------|
| • Core java | • Python | • SQL | • GenAI Integration | • Pandas |
| • NumPy | • Machine Learning, | • Git | • PyTorch | • Linux |
| • Keras | • Data Analysis | • NLP | • Docker | • AWS |
| • Automation Workflows | • Team Management. | • OOP'S | • Problem-Solving | • Vercel |

EXPERIENCE

Software Engineer – RBRICKKS Technology, Pune

(May 2025 – Present)

- Designing and developing **custom enterprise software, websites, and mobile applications** for clients. Pune, MH
- Built **AI-powered automation solutions** integrating GenAI models for faster and smarter development.
- Collaborated with cross-functional teams to ensure **high-quality, scalable, and secure deployments**.
- Contributed to **client-specific solutions** in industries like automotive and real estate.

AI Intern - igebra.ai

(June 2024 – May 2025)

- Developed **GenAI** applications by integrating cutting-edge AI models for educational and content-based platforms.
- Created AI-powered content, boosting platform reach and user interaction by 30%.
- Worked on **Vercel V0** technologies, deploying innovative projects with seamless workflows.
- Conducted iterative improvements on AI-driven tools to enhance user experience and performance.
- Leveraged agile methodologies for efficient project delivery within tight deadlines.

Software Intern - PhoenixGen Systems Private Limited

(Dec 2023 – June 2024)

- Developed and integrated **GenAI** models using **Docker** containers and **Flutterflow** for front-end Enhancements, reduced app load times by 40% and boosted user engagement by 25% within three months. Pune, MH
- Utilized **Docker** for version control and to manage dependencies across different environments, enhancing consistency by 50%.
- Created and managed **Dockerfiles** for building custom images tailored to project requirements, reducing build times by 20%.
- Optimized **Docker images** to reduce size by 35% and improve application performance.

PROJECTS

Real Estate CRM (Mobile Application)

(Aug 2024 – Present)

- Designed and developed a **mobile-only Real Estate CRM app** with **role-based access**.
- Implemented **Sales module** with call recording, updates, time tracking, and customer interest categorization.
- Integrated **customer/lead management, performance scoring, and detailed reporting dashboards**.
- Tech stack: **React Native, Node.js/Express, MySQL, AI-assisted development tools**.
